

# An Introduction *To FastBridge Fiber*

June 2022

# Internet Is The Third Utility

*Ultra-Fast And Reliable Internet Service Is A Must In Today's World*

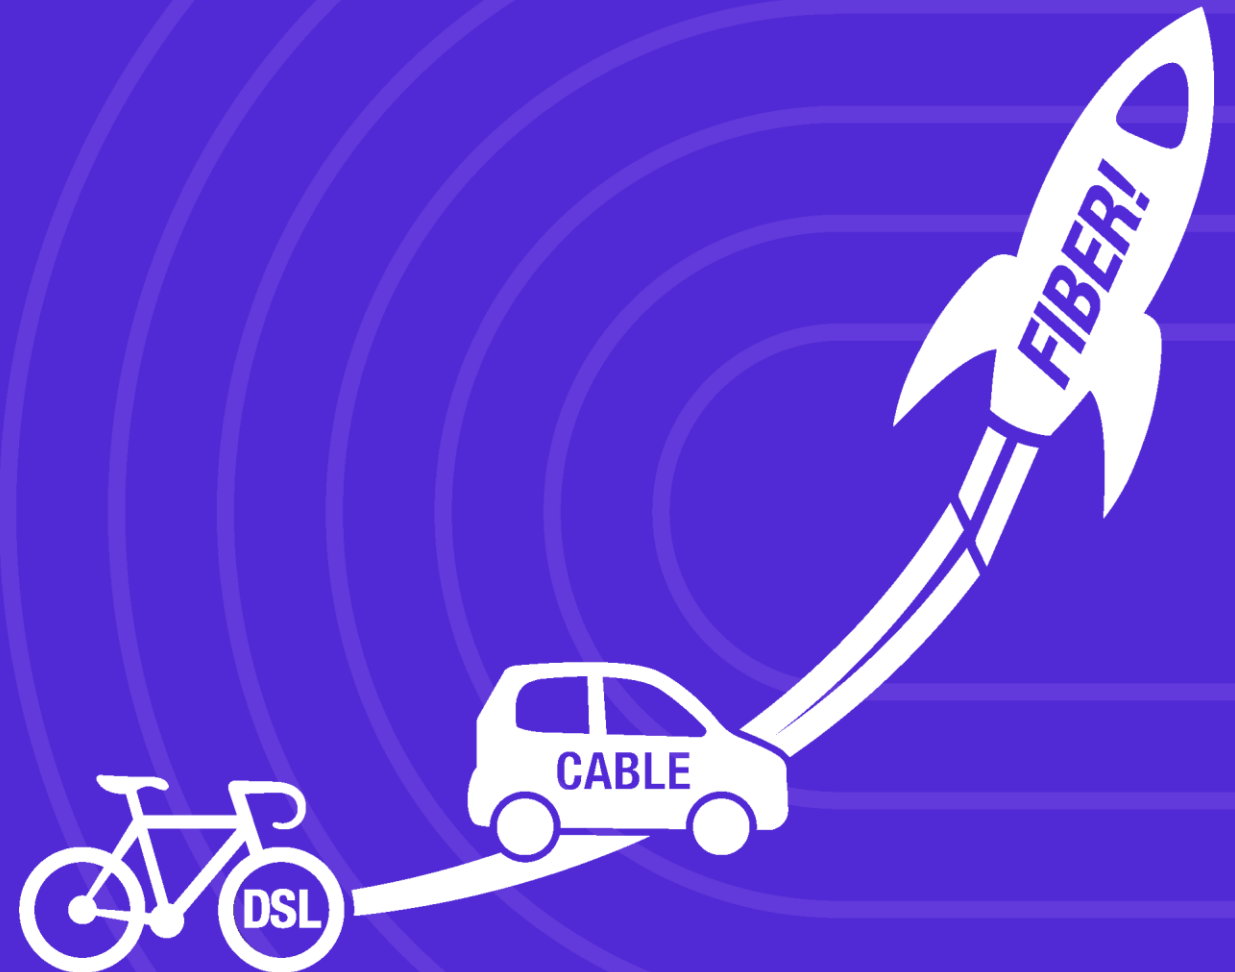

# Fiber Capabilities Far Surpass Cable

	TECHNOLOGY	TRANSMISSION	SECURITY	SYMMETRY	
<b>Fiber</b> 	Uses small flexible strands of glass to transmit data as light	Transmits data faster, clearer, and over greater distances without loss of quality though pulses of light	Fiber lines are secure and easier to detect compromised lines	Symmetrical speeds; equally fast upload and download which is needed for video conferencing, uploading or sharing files, gaming or streaming	✓ Gigabit Speed ✓ Reliable ✓ Scalable
<b>Cable</b> 	Uses coaxial copper core cable with aluminum, a copper shield and outer plastic layer for the purpose of providing video	Cable functions on the transmission of electrical signals, is slower and susceptible to interference from weather, moisture, radio signals	More at risk of being tapped; compromising your personal data	Cable only offers asymmetrical speeds, meaning you are typically subject to sharing bandwidth with your neighbors making your home network inconsistent	

# What's So Great About FastBridge Fiber?

- 100% fiber for speed, reliability and capable of supporting multiple devices
- 100% new network built with our customers in mind; no legacy patchwork systems prone to outages and problems
- Hassle-free pricing plans
- Attentive customer service
- Hiring people from the local community to build our team
- Supported by equity financing from Guggenheim Investments

# Our Purpose & Core Values

*Enriching communities we serve by connecting people.*

## Customer-Centered

We align and prioritize our company's goals with the needs of our customers

We are attentive to our customers' needs

## Simplicity, Agility & Speed

We act with a sense of urgency and are easy to work with

## Community-Focused

We serve the communities in which we live and work

We invest time and money to improve the lives of our fellow residents

## Passionate Employees

We recruit positive and energetic people who believe deeply in our purpose

Our people are passionate about working as a team and are both honest and respectful

# Lightning-fast fiber internet. Finally.

Home Internet Service Plans (Business Plans Available)

## FIBER NETWORK

- Fastest technology available
- Brand new end-to-end fiber network connecting you straight to the Internet
- More reliable than old cable and phone company networks

500 Mbps

\$ 59/month

## LOCAL TEAM

- Hiring experts in your area
- Improving your community's infrastructure
- Fiber internet in your neighborhood increases home values up to 3%\*

\*FTTH Councils America

1 Gig

\$ 79/month

## EASY TO WORK WITH

- Simple pricing with no hidden fees or gimmicks
- Live customer support
- Simple online signup, billing, and payment options

2 Gig

\$ 119/month
